

WOLFE VETS

REFERRALS

Wolfe Referrals understands how important it is that your patients receive care swiftly and skillfully. We are committed to helping animals when referring vets need us, when pets' welfare is at stake. We make the referral process quick and simple, and are available to communicate about current or future cases.

Our referral team has worked at tertiary and secondary referral centres across the UK, and can provide timely and expert, surgical or non-surgical solutions to pets with complex and challenging conditions.

ORTHOPAEDICS & SPINAL SURGERY

Dr. Stuart Cooke, RCVS Recognised Advanced Practitioner in Small Animal Surgery, has founded, operated and managed three major referral hospitals. He is one of the UK's leading small animal hip surgeons and is the primary surgical

tutor at the inaugural Kyon UK Total Hip Replacement training programme. He undertakes a full range of spinal and orthopaedic referrals.

Dr. Ian Simpson, RCVS Advanced Practitioner in Small Animal Surgery. Dr. Simpson takes referrals for spinal and joint disease, complex fractures and angular limb deformity. He has worked at several of the large tertiary referral centres

and is a past board member of the British Veterinary Orthopaedic Association.

DENTISTRY AND MAXILLOFACIAL SURGERY

Dr. Jonathan Frost, Veterinary Dentist and Oral Surgeon. We are excited to announce our newest consultant Dr. Frost. Jonathan sees patients every Thursday at Wolfe

Vets. We have a dedicated Dentistry Suite for complete oral health assessments and treatments, restorative dentistry and therapeutic extractions. Our CT scanning and overnight care allow maxillofacial surgery. Jonathan takes dentistry and oral surgery referrals.

ORTHOPAEDICS & SOFT TISSUE SURGERY

Dr. James Bennett, RCVS Advanced Practitioner in Small Animal Surgery. Dr. Bennett receives referrals in joint, bone and spinal pathology; developmental, traumatic and degenerative conditions. He is particularly involved with fractures

and cases of stifle & elbow pathology.

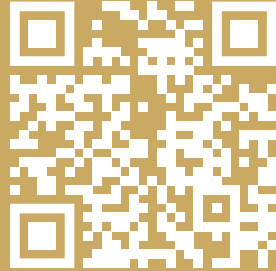

Dr. Bennett also receives referrals in head, neck, abdominal, perineal and a range of thoracic soft tissue surgical procedures. He is interested in large or challenging tumour removal, advanced wound closure and the use of CT to allow accurate surgical planning.

Dr. Bennett founded Wolfe Vets and has led it to become one of only a few centres in London, equipped to offer advanced diagnostics and treatment, including spinal and orthopaedic surgery, to patients.

WOLFE VETS REFERRALS

Vets can call
